

MiniTracker III Wand Reader

AVID1043 or AVID1043/FLEX36

AVID 1043

AVID 1043/FLEX36

Universal wand readers are a great way to protect your staff from fractious animals!

AVID's products are used by animal control facilities and humane societies around the world and have helped protect millions of companion animals.

The AVID MiniTracker III Wand Reader is engineered for convenience and performance, providing the user with the ideal solution when portability and protection from fractious animals is important.

The MiniTracker III is capable of reading ID tags from different manufacturers. The Wand Reader was designed to read and display any AVID, FECAVA, TROVAN and ISO FDX-B coded radio frequency identification tags. The antenna, the read button and handle are waterproof and can be immersed under water as long as the reader itself is kept out of the water. The ID code is displayed on the MiniTracker III's 16 character LCD.

Specifications

AVID 1043/FLEX36 - Flexible Wand or
AVID 1043 - Rigid Wand

TAG COMPATIBILITY: AVID, (125 kHz) FECAVA, (125 kHz) TROVAN (128 kHz) and ISO (134.2 kHz) FDX-B coded ID tags, produced by multiple manufacturers.

OPERATING FREQUENCY: 125 kHz

TEMPERATURE RANGE: Operating: 32 to 122F (0 to 50 C)

Storage: 4 to 158F (-20 to 70 C)

POWER: (1) 9- Volt alkaline battery

DISPLAY: 16 Character Liquid Crystal Display (LCD)

INDICATORS: Audible beeps/Visual LCD

DIMENSIONS:

Reader: 2.4"W (6cm) x 6.9"L (18cm) x .86"H

Wand: 21"L (53.3cm) x 5"W (12.7cm) Coil I.D. 4"

(10.16cm) .67"H (1.7cm)

Wand Cable: 3ft (91.4cm)

WEIGHT: 1.05 lbs. (477g) including battery

TYPICAL READ DISTANCE:

AVID Injectable Chip 4.0+" (10.16cm)

AVID Ear Tag 6.0+" (15cm)

AVID Cattle Bolus 12.0+" (30cm)

FCC APPROVAL: FCC ID: IOL-125-AV1043

CE CERTIFIED
